

QUICK

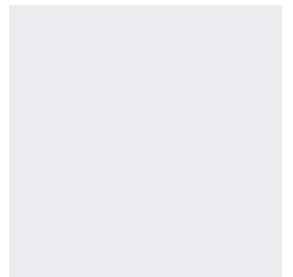

HYDRAULIC LIFTER

HANDLING OF HALF PALLETS

The Quick pallet truck handles items weighing up to 300 kg in a quick and simple way, e.g. display pallets, half pallets, wire cages or Euro pallets (long and short side).

The unique lifting device is fast and simple. Press the foot pedal and lift the pallet. When the pedal is down, the pallet truck automatically locks in a lifted position. When you press the foot pedal again, the pallet is lowered.

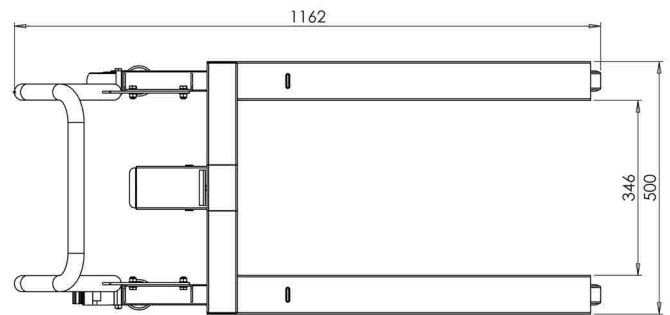

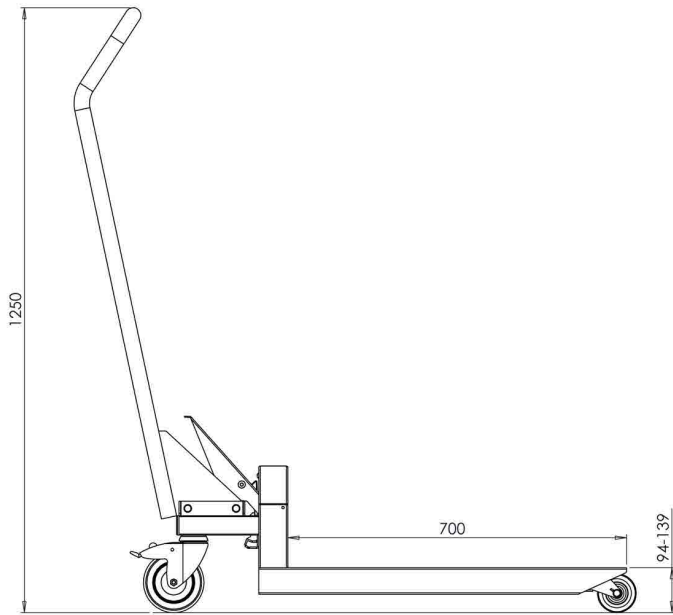

Quick is not a stock item at Hovmand, but can be produced as project sales in larger quantities.
